

BUSINESSES - COMPANIES – INDUSTRIES Upper Hutt District

This compiled alphabetical A to Z list of covers the Businesses, Companies and Industries that are or were once situated in the Upper Hutt district.

I have compiled the list below from various sources including the Universal Business Directories (**UBD**) from Petone Library and Alexander Turnbull Library.

The “*Closed Company Files*” are held in the Wellington Office at (**ANZ**) Archives New Zealand. Not all the files have survived and only some include the place name Upper Hutt in the search field. If any of the New Zealand companies have the same name you have to view the files to determine if there is an Upper Hutt connection. Researching can also be complicated when the owners sell and change the name of the business or company.

I have viewed and transcribed some of the “*Closed Company Files*” and created two (2) documents in date order [1] 1900-1950 & [2] 1950-1980. The documents are available on the website address recorded in left corner above and have been highlighted in yellow below next to the Company concerned. The Archives New Zealand (**ANZ**) ID number for the Closed Company Files that I have not viewed or transcribed, are highlighted in blue below next to the Company concerned. Viewing and transcribing the Closed Company Files will continue when time permits.

The Stones and Wises Post Office Directories (**DIR**) record the businesses and households in alphabetical order of Street name. The Directories will be helpful when researching an individual business or company especially when the Company has an address change. I will also be using some of the Electoral Rolls (**ER**) that cover the Upper Hutt district.

It is not known what the Upper Hutt City Council Record Department (**UHCC**) hold in regard to lists or information about the Businesses, Companies or Industries in the Upper Hutt district.

The Upper Hutt Leader (**UHL**) will be a valuable source of information when compiling the history of the various Upper Hutt Businesses, Companies and Industries including the owners and/or managers.

Interviewing local people who were employed by the various businesses or others who have valuable local knowledge is most important as when they have gone the knowledge goes with them.
